Kali LInux

PROFILE

Looking a few years back, you could've labeled me as an Food engineer and Manager with experience in HR, finance, insurance, sales and managing.
Then I got involved in tech industry, quickly caught up, and started my career path as a iOS developer.
Because of all the skills, I've picked up along the way, business analyst skills, poeple relations skills, my next big step was toward Project/Product managment. Best decision ever.
